Scenarios VOP - Simple Interrupted
Courses 2016 PGY I Boot Camp

Report Run

July 2, 2025 3:03 PM

Evaluatee	1016, 1016
Evaluator	Crosby, Dana
Course	2016 PGY I Boot Camp
Scenario	VOP - Simple Interrupted ()
Participant Type	Learner
Evaluation Type	Live or debrief (instructor)
Evaluation Name	VOP - Simple Interrupted
Score	10.0 / 0.0
Submitted	08/09/2016 10:38 PM

1. Passes needle perpendicular to skin on both sides of skin

- ☒ Yes
☐ No

2. Avoids multiple forceps grasps of skin

- ☒ Yes
☐ No

3. Instrument ties with square knots

- ☒ Yes
☐ No

4. Approximates skin with appropriate tension

- ☒ Yes
☐ No

5. Places sutures 0.5 - 1.0 cm apart

- ☒ Yes
☐ No

6. Eversion of the skin edges

- ☒ Yes
☐ No

7. Economy of Time and Motion

- ☐ Many unnecessary / disorganized movements
☐
☒ Organized time / motion, some unnecessary movements
☐
☐ Maximum economy of movement and efficiency

8. Final Rating / Demonstrates Proficiency

- ☒ Yes
☐ No

9. Other Summative Comments

Good job overall. Could improve efficiency with more practice. Some reposition of suture/needle and a bit of inconsistency of the tension of the sutures, but overall good technique.

Evaluatee	1116, 1116
Evaluator	Crosby, Dana
Course	2016 PGY I Boot Camp

☒
☐ Maximum economy of movement and efficiency

8. Final Rating / Demonstrates Proficiency

- ☒ Yes
☐ No

9. Other Summative Comments

Very nice demonstration. Only suggestion is perhaps to tighten knots down slightly more on some of the sutures, but really a very good demonstration.

8. Final Rating / Demonstrates Proficiency

- ☒ Yes
☐ No

9. Other Summative Comments

Good job overall. Would recommend tying your knots with tension in a direction that is perpendicular to the incision/wound. Also, would emphasize even more strongly entering the skin at a 90 degree angle to evert the skin edges more.

- ☒ Yes
☐ No

9. Other Summative Comments

Occasionally not laing first throw down square. Also don't be afraid to take in two bites if that helps get a more consistently square thrown on second side, but overall looked good and fluent.

- ☒ Yes
☐ No

9. Other Summative Comments

Would leave tails a little longer to make easier to grasp when instrument tying, and can use forceps more than you did--didn't use at all on some throws, and you will need to use in real tissue most of the time. Overall a well demonstrated performance.

9. Other Summative Comments

Good job overall. Good eversion of skin edges. Always try to take similarly sized bites on each side of the incision. One or two sutures had unequal bites, but the rest looked great.

9. Other Summative Comments

Good job overall. With increased experience economy of motion will continue to improve. Focus on entering the skin perpendicularly to the surface and exiting perpendicularly. I really try to overemphasize that as this will really ever the skin edges nicely on a real patient.

9. Other Summative Comments

Good job with simple interrupted suturing. Would recommend entering the skin at a more perpendicular angle. This is something to really focus on as this maneuver is what really everts the skin edges and makes for a nicely healing scar for long term outcomes following contracture. Try to push the knot down perpendicular to the incision as well.

9. Other Summative Comments

Overall good job. Be careful when laying down the knots. They could be a bit more square. Would recommend always laying the knot down by pulling perpendicular to the wound in opposing directions with each throw.
